

First Section

- Work out a blueprint of what it would look like but focus primarily on the first sprint.
- Do research on other kinds of Q&A forums for inspiration.
- Start basic functions with flask for Q&A forum

Second Section

- Worked on drafting our user interface and sample pages connecting the pages to one another as well as their functions. (Design and layout)

Third Section

- Start working on the HTML & CSS to structure the pages that we have designed.
- Clean up our page designs

Fourth Section

- Which flask database we will be using, and how to set it up.
- Can we use open source js code?
